AUTHOR INDEX

Beatty, Roger J.
Some Fatigue Properties of Rubber Blends, p. 147

Casey, Colleen J.
Toxicity of Pyrolysis Gases from Plastics and Elastomers, p. 3

Cogswell, F. N.
Rheology and Mechanical Properties: A Study of the Influence of Processing History on the Impact Resistance of Thermoplastics, p. 171

Cole, E. A.
Rheology and Mechanical Properties: A Study of the Influence of Processing History on the Impact Resistance of Thermoplastics, p. 171

Critchfield, F. E.
Silane Effects and Machine Processing in Reinforced High Modulus RIM Urethane Composites, p. 280

Cumming, Heather J.
Toxicity of Pyrolysis Gases from Plastics and Elastomers, p. 3

Smoke from Plastics and Elastomers, p. 110

Flash-Fire Propensity of Plastics and Elastomers, p. 239

Damusis, A.
Blocked Isocyanate Systems Using Aromatic Triazoles, p. 15

Dinbergs, K.
Thermoplastics Polyurethane Elastomer Molecular Weight-property Relations. Further Studies, p. 58

Dominick, Gerry
Reinforced Thermoplastic Structural Foam, p. 133

Edelman, Robert
A New Polyester System for Automotive Composite Applications, p. 140

Fertis, Demeter G.
Low Cost Wind Generator Urethane Rotors, p. 253

Frisch, K. C.
Blocked Isocyanate Systems Using Aromatic Triazoles, p. 15

Gamache, A. R.
Recycling of Thermoset Polyurethane Elastomers, p. 208

Groenendaal, A.A.M.
The Use of Peroxyketals as Initiators for Curing Unsaturated Polyester Sheet Molding Compound, p. 117

Hilado, Carlos J.
Toxicity of Pyrolysis Gases from Plastics and Elastomers, p. 3

'Smoke from Plastics and Elastomers, p. 110

Toxicity of Gases Produced from Pyrolysis of Polychloroprene Flexible Foams, p. 201

Flash-Fire Propensity of Plastics and Elastomers, p. 239

Iwase, Yoshiyuki
Color Improvement of Petroleum Resin "Some Components Coloring Petroleum Resin in Thermal Cracked Higher Fractions," p. 307

Flash-Fire Propensity of Plastics and Elastomers, p. 239

Iwase, Yoshiyuki
Color Improvement of Petroleum Resin "Some Components Coloring Petroleum Resin in Thermal Cracked Higher Fractions," p. 307

Jacobs, R. L.
Blocked Isocyanate Systems Using Aromatic Triazoles, p. 15

Kolczynski, J. R.
The Use of Peroxyketals as Initiators for Curing Unsaturated Polyester Sheet Molding Compound, p. 117

Krick, D.
The theory of Power Cable Vulcanization Without Steam, p. 97

Leis, D. G.
Reinforced RIM Urethane Elastomer – A New Material for the Automotive Industry, p. 301

Long, J. W.
Blocked Isocyanate Systems Using Aromatic Triazoles, p. 15

McMahon, Paul E.
A New Polyester System for Automotive Composite Applications, p. 140

Morford, Ralph H.
Toxicity of Gases Produced from Pyrolysis of Polychloroprene Flexible Foams, p. 201

Morgan, R. M.
Non-Lead Stabilization of Chlorinated Polyethylene in Wire and Cable, p. 213

Murphy, Regina M.
Smoke from Plastics and Elastomers, p. 110

Flash-Fire Propensity of Plastics and Elastomers, p. 239

Owen, Gwilym E., Jr.
Impact Resistant Resin for Low Profile SMC, p. 269

Odinak, A.
Recycling of Thermoset Polyurethane Elastomers, p. 208

Roskott, L.
The Use of Peroxyketals as Initiators for Curing Unsaturated Polyester Sheet Molding Compound, p. 117

Ross, Robert S.
Low Cost Wind Generator Urethane Rotors, p. 253

Schneider, Jane E.
Toxicity of Gases Produced from Pyrolysis of Polychloroprene Flexible Foams, p. 201

Schollenberger, C. S.
Thermoplastic Polyurethane Elastomer Molecular Weight-Property Relations. Further Studies, p. 58

Schwarz, E. G.
Silane Effects and Machine Processing in Reinforced High Modulus RIM Urethane Composites, p. 280

Seymour, D. C.
The Theory of Power Cable Vulcanization Without Steam, p. 97

Tackett, L. P.
Silane Effects and Machine Processing in Reinforced High Modulus RIM Urethane Composites, p. 280

Tarin, P. M.
Silane Effects and Machine Processing in Reinforced High Modulus RIM Urethane Composites, p. 280

Thomas A.
The Use of Peroxyketals as Initiators for Curing Unsaturated Polyester Sheet Molding Compound, p. 117

Tucker, B.
Recycling of Thermoset Polyurethane Elastomers, p. 208

Turner, S.
Rheology and Mechanical Properties: A Study of the Influence of Processing History on the Impact Resistance of Thermoplastics, p. 171

Vaidya, U. I.
Flame Retarded EPDM Integral Insulation Jacket Compositions with Excellent Heat Resistance and Electrical Stability, p. 37

Wong, S. W.
Blocked Isocyanate Systems Using Aromatic Triazoles, p. 15

SUBJECT INDEX

α,α′-bit (t-butyl peroxy) Diisopropyl Benzene
Non-Lead Stabilization of Chlorinated Polyethylene in Wire and Cable, p. 213

Automotive Industry
Reinforced RIM Urethane Elastomer – A New Material for the Automotive Industry, p. 301

Benzo- and Tolyl-triazoles
Blocked Isocyanate Systems Using Aromatic Triazole , p. 15

Blends
Some Fatigue Properties of Rubber Blends, p. 147

Blocking Agents of Isocyanates
Blocked Isocyanate Systems Using Aromatic Triazoles, p. 15

Borate Esters
Non-Lead Stabilization of Chlorinated Polyethylene in Wire and Cable, p. 213

Carbon Fiber
A New Polyester System for Automotive Composite Applications, p. 140

Chlorinated Polyethylene
Non-Lead Stabilization of Chlorinated Polyethylene in Wire and Cable, p. 213

Color Improving Resins
Color Improvement of Petroleum Resin "Some Components Coloring Petroleum Resin in Thermal-Cracked Higher Fractions," p. 307

Composites
A New Polyester System for Automotive Composite Applications, p. 140

Cracking
Some Fatigue Properties of Rubber Blends, p. 147

Deblocking Agents
Blocked Isocyanate Systems Using Aromatic Triazoles, p. 15

Dicumyl Peroxide
Non-Lead Stabilization of Chlorinated Polyethylene in Wire and Cable, p. 213

Design
Low Cost Wind Generator Urethane Rotors, p. 253

Diallyl Phthalate
A New Polyester System for Automotive Composite Applications, p. 140
Elastomers
Some Fatigue Properties of Rubber Blends, p. 147

Elastomer Stabilization
Non-Lead Stabilization of Chlorinated Polyethylene in Wire and Cable, p. 213

Elastomer Urethanes, Physical Properties
Thermoplastic Polyurethane Elastomer Molecular Weight-Property Relations, Further Studies, p. 58

EPDM, Flame Retardant
Flame Retarded EPDM Integral Insulation Jacket Compositions with Excellent Heat Resistance and Electrical Stability, p. 37

EPDM Network Cable
Flame Retarded EPDM Integral Insulation Jacket Compositions with Excellent Heat Resistance and Electrical Stability, p. 37

EPDM Polymers, Heat Resistance
Flame Retarded EPDM Integral Insulation Jacket Compositions with Excellent Heat Resistance and Electrical Stability, p. 37

Epoxidized Bisphenol A
Non-Lead Stabilization of Chlorinated Polyethylene in Wire and Cable, p. 213

Epoxy Novolacs
Non-Lead Stabilization of Chlorinated Polyethylene in Wire and Cable, p. 213

Fast Curing
A New Polyester System for Automotive Composite Applications, p. 140
Fatigue
Some Fatigue Properties of Rubber Blends, p. 147

Flash Fires, Plastics
Flash Fire Propensity of Plastics and Elastomers, p. 239

Glycolysis
Recycling of Thermoset Polyurethane Elastomers, p 208

Impact Reistance, Thermoplastics
Rheology and Mechanical Properties: A Study of the Influence of Processing History on the Impact Resistance of Thermoplastics, p. 171

Infrared Heat Transfer
The Theory of Power Cable Vulcanization Without Steam, p. 97

Jacket Insulation, Wire
Flame Retarded EPDM Integral Insulation Jacket Compositions with Excellent Heat Resistance and Electrical Stability, p. 37

Low Cost
LowCost Wind Generator Urethane Rotors, p. 253

Magnesium Oxide
Non-Lead Stabilization of Chlorinated Polyethylene in Wire and Cable, p. 213

Material Properties
Low Cost Wind Generator Urethane Rotors, p. 253

Molds, For Charpy Bars
Rheology and Mechanical Properties: A Study of the Influence of Processing History on the Impact Resistance of Thermoplastics, p. 171

MW – Property Relationships, Urethanes
Thermoplastic Polyurethane Elastomer Molecular Weight-Property Relations, Further Studies, p. 58

Oil Extension
Some Fatigue Properties of Rubber Blends, p. 147

One-Component Urethane Coatings
Blocked Isocyanate Systems Using Aromatic Triazoles, p. 15

Peroxyketals, Initiators
The Use of Peroxyketals as Initiators for Curing Unsaturated Polyester Sheet Molding Compound, p. 117

Polychloroprene Foams, Pyrolysis
Toxicity of Gases Produced from Pyrolysis of Polychloroprene Flexible Foam , p. 201

Prepreg
A New Polyester System for Automotive Composite Applications, p. 140

Processing History, Thermoplastics
Theology and Mechanical Properties: A Study of the Influence of Processing History on the Impact Resistance of Thermoplastics, p. 171

Pyrolysis Gases, Toxicity
Toxicity of Pyrolysis Gases from Plastics and Elastomers, p. 3
Toxicity of Gases Produced from Pyrolysis of Polychloroprene Flexible Foams, p. 201

Recycling
Recycling of Thermoset Polyurethane Elstomers, p. 208

Reinforced RIM
Reinforced RIM Urethane Elastomer – A New Material for the Automotive Industry, p. 301

Recycling of Theroset Polyurethane Elastomers, p. 208

Reuse of Recycled Polyol
a) in RIM b) in Rigid PU Foam
Recycling of Thermoset Polyurethane Elastomers, p. 208

RIM
Recycling of Thermoset Polyurethane Elastomers, p. 208
Reinforced RIM Urethane Elastomer – A New Material for the Automotive Industry, p. 301

Reinforced RIM, Silane Effects
Silane Effects and Machine Processing in Reinforced High Modulus RIM Urethane Composites, p. 280

RIM Composites
Silane Effects and Machine Processing in Reinforced High Modulus RIM Urethane Composites, p 280

RIM, For Automotive
Silane Effects and Machine Processing in Reinforced High Modulus RIM Urethane Composites, p. 280

RIM Processing, Silane Effects
Silane Effects and Machine Processing in Reinforced High Modulus RIM Urethane Composites, p. 280

Rotor Blades
Low Cost Wind Generator Urethane Rotors, p. 253

SMC, Impact Resistance
Impact Resistant Resin for Low Profile SMC, p. 269

SMC, Unsaturated Polyester
The Use of Peroxyketals as Initiators for Curing Unsaturated Polyester Sheet Molding Compound, p. 117

Smoke, From Various Elastomers
Smoke From Plastics and Elastomers, p. 110

Smoke, From Various Plastics
Smoke From Plastics and Elastomers, p. 110

Strain
Some Fatigue Properties of Rubber Blends, p. 147

t-butyl perbenzoate
Non-Lead Stabilization of Chlorinated Polyethylene in Wire and Cable, p. 213

Testing
Low Cost Wind Generator Urethane Rotors, p. 253

Thermal Stability, Insulation
The Theory of Power Cable Vulcanization Without Steam, p. 97

Thermoset Elastomers
Recycling of Thermoset Polyurethane Elastomers, p. 208

Tri (2 ethyl hexyl) trimellitate
Non-Lead Stabilization of Chlorinated Polyethylene in Wire and Cable, p. 213

Unsaturated Polyester
A New Polyester System for Automotive Composite Applications, p. 140

Urethane Elastomers
Thermoplastic Polyurethane Elastomer Molecular Weight-Property Relations, Further Studies, p. 58

Blocked Isocyanate Systems Using Aromatic Triazoles, p. 15

Reinforced RIM Urethane Elastomer – A New Material for the Automotive Industry, p. 301

Urethane Wind Rotors
Low Cost Wind Generator Urethane Rotors, p. 253

Vulcanization, Power Cable
The Theory of Power Cable Vulcanization Without Steam, p. 97

Vulcanization Rates, Prediction of
The Theory of Power Cable Vulcanization Without Steam, p. 97
